I clearly understand and agree that all services rendered me are charged directly to me and that I am personally responsible for payment. I also understand that if I suspend or terminate my care and treatment, any fees for professional services rendered me will be immediately due and payable. I hereby authorize physicians and staff at Life Chiropractic (aka Palmer Chiropractic Inc, PS) to treat my condition as deemed appropriate. It is understood and agreed the amount paid to the doctor for X-rays, is for examination only and the X-ray negatives will remain the property of this office, being on file where they may be seen any time. The doctor will not be held responsible for any pre-existing medically diagnosed conditions.

I certify that the above information is correct to the best of my knowledge. I will not hold my doctor or any staff member of Life Chiropractic responsible for any errors or omissions that I may have made in the completion of this form.

Chiropractic, as well as many other types of health care, is associated with potential risks in the delivery of treatment. Therefore it is necessary to inform the patient of such risks prior to initiating care. While chiropractic treatment is remarkably safe, you need to be informed about the potential risks related to your care to allow you to be fully informed before consenting to treatment.

Chiropractic is a system of health care delivery and therefore, as with any health care delivery system, we cannot promise a cure for any symptom, condition or disease as a result of treatment in this office. An attempt to provide you with the very best care is our goal and if the results are not acceptable, we will refer you to another provider who we feel can further assist you.

Specific Risk Possibilities Associated with Chiropractic Care.

Soreness- Chiropractic adjustments and physical therapy procedures are sometimes accompanied by post treatment soreness. This is a normal and acceptable accompanying response to chiropractic care and physical therapy. While it is not generally dangerous, please advise your doctor if you experience soreness or discomfort.

Soft Tissue Injury- Occasionally chiropractic treatment may aggravate a disc injury or fracture. Precautions such as pre-adjustment x-rays are taken for cases considered at risk. Treatment is performed carefully to minimize such risk.

Rib Injury- Manual adjustments to the thoracic spine, in rare cases, may cause rib injury or fracture. Precautions such as pre-adjustment x-rays are taken for case considered at risk. Treatment is performed carefully to minimize such risk.

Stroke- Stroke is the most serious complication of chiropractic treatment. The most recent studies (*Journal of the CAA*, Vol. 37 No. 2, June 1993) estimate that the incidence of this type of stroke is 1 in every 3 million upper cervical adjustments.

Other Problems- There are occasionally other types of side effects associated with chiropractic care. While these are rare, they should be reported to your doctor promptly.

If you have any questions concerning this form or the above statements, please ask your doctor.

Having carefully read the above, I hereby give my consent to have chiropractic treatment administered to myself or the person named below.
